

# St. Paul Public School District & MOVING with MATH® EXTENSIONS 2016 Summer School Results

The St. Paul Public School District began using the Moving with Math Foundations program in the fall of 2013 for their RTI students. They achieved great success and decided to bring the proven Learning System to their students year round and district wide.

In the summer of 2014, they implemented a 17 day summer school and Moving with Math developed customized pacing plans for EXTENSIONS Grades K-8 to guide their path. For the past three years EXTENSIONS has increased achievement by providing research based Concrete-Representational-Abstract (CRA) instruction in a Learning System that works and makes math FUN!

**“We remember  
10 % of what we Hear  
30% of what we See and  
90% of what we Do.”**

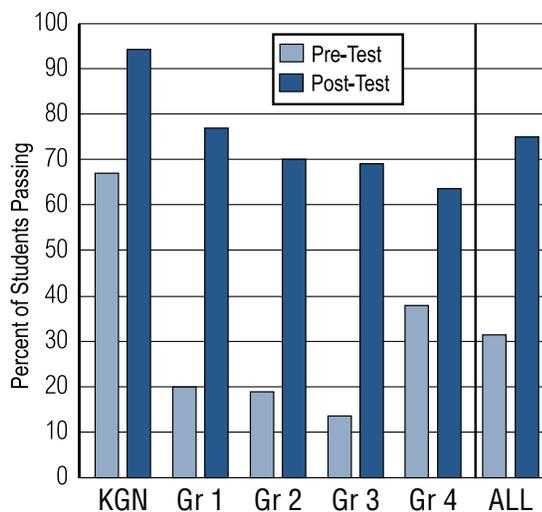

- Jean Piaget

## “Students Show Amazing Improvement”

Elizabeth Putnam - St. Paul, MN Pulic School District - Academic Programs Coordinator
