a. perimeter of squares and rectangles; e.g., using a coordinate plane Jack started at school (1,2) traveled to the post office (3 1/2, 2), then went by the fire station (3 1/2, 3), then visited the park (1, 3), and finally returned to school. Determine the distance Jack traveled.					**SB:** 38-1
b. circumference (perimeter) of circles, e.g., Jane jogs on a circular track with a radius of 100 feet. How far would she jog in one lap?					**SB:** 39-1
c. area of circles, parallelograms, triangles, squares, and rectangles; e.g., if the sprinkler head is centered at (3, 4) and we know it reaches point (3, -2) on the coordinate plane, determine the area being watered.				69	**SB:** 40-1, 56-1
